## About the Conference

India's economic growth has passed through four major phases over the past 60 years and is now set to enter a new phase. From past five years there is the fastest pace of growth in the country's history to an average of 8.5 per cent per annum. The Inclusive

growth strategy included a sharp increase in investment in rural areas, rural infrastructure and agriculture; spurt in credit for farmers; increase in rural employment through a unique social safety net; and a sharp increase in public spending on education and health care. Growth has to be inclusive. Growth with equity is the only road that India can take. For a rapid and sustained poverty reduction there must be an inclusive growth that allows people to contribute to and benefit from economic growth. Rapid pace of growth is unquestionably necessary for poverty reduction, but for this growth to be sustainable in the long run, it should be broad-based across sectors and inclusive of all parts of society. Inclusive growth is necessary for sustainable development and equitable distribution of wealth and prosperity. Given this, the Department of Social Work, VSKU P.G.Centre, Nandihalli-Karnataka is organizing National conference on Inclusive Growth and Sustainable Development: Social Work Interventions.
