

Department of Studies in Sociology

Programme Outcomes (POs):

At the end of the programme students will be able to:

PO1: Sociology is an oldest science but having a short history. As one of the youngest social science it scientifically and broadly studies human society. A student can understand the in-depth knowledge of society and human relations. He/She is able to research and identify even minute social problems like crime, poverty, disintegration of marriage and family, violence in community and among women, disputes and movements etc, and certainly give the appropriate solutions to this.

PO2: This subject helps a lot especially to the developing and under developed countries where more works is to be done for the welfare of the marginalized and weaker sections of people. Students who learnt this paper can able to give his ideas in the reconstruction of society in the form of framing social policy and establishing new social planning.

PO3: Even in major competitive examinations like IAS, IPS, IFS, KAS, KPS etc. sociology is considered as a major and optional papers and plays very important role in the selection process. Not only in teaching field, its scope is more in research field, a good researcher can take up projects of national and international levels and not negligible in local research also. Today the invention of sociology is not only confined to social science but its application in physical and engineering field also remarkable.

PO4: An honors Graduate student of Sociology should able to develop:

- **Critical Thinking:** The programme seeks to develop in students the sociological knowledge and skills that will enable them to think critically and imaginatively about society and social issues.
 - **Sociological Understanding:** The ability to demonstrate sociological understandings of phenomena, for example, how individual biographies are shaped by social structures, social institutions, cultural practices and multiple axes of difference and inequality.
 - **Written and Oral communication:** the ability to formulate effective and convincing written and oral arguments.
 - **Better understanding of real life situation:** The ability to apply sociological concepts and theories to the real world and ultimately their everyday lives.
- Analytical Thinking:** Field survey and preparation of dissertation paper is an inseparable part of sociology Hons program.
