Action Taken Report

The faculty of Social Work brainstormed the feedback analyses and discussed in the length and deliberated on different aspects of feedback. Teachers have made efforts to relate the curriculum with real life situations through case analysis and role play method of teaching. In addition to this, Teachers have paid more attention towards practical sessions and they are able to integrate the course more effectively and have made their teaching more experiential. Faculty members have the freedom and they are encouraged to adopt innovative techniques/strategies of teaching. Since communication skills play an important role, faculty members have incorporated this fragment of improving student's communication skills and overall development of students through mentoring them closely, assigning presentations and project works.

Faculty members are continuously encouraging students and helping them not just in academic matters but also for their overall development. To integrate the curriculum with latest developments every course has a model that emphasizes on latest development in the particular area. To give more importance to practical exposure, we introduced Skill based papers for 1st and 2nd semester and Specialization wise Orientation visit to 3rd semester and Faculty members are continuously monitoring the Students.
